The Chinese Economy

By Professor Gregory Chow

2011-2012, Fall semester, WISE

List of topics:

1. Demand and supply for residential housing in Urban China
(www.princeton.edu/~gchow - "document downloads" section)
2. Inflation in Taiwan and Mainland China (Attachment)
3. National Income Determination in China and in Taiwan (Attachment)
4. Usefulness of Adaptive and Rational Expectations in Economics (Attachment)
5. Globalization of East Asian economies through co-movement of stock prices
6. China as leader of the world economy

Reading assignments:

Students should read the assignments for the first three lectures to be given in the first week before Prof. Chow arrive. Then Prof. Chow will give reading assignments for the remaining lectures during the first week.

The following reading assignments can be found in the "document downloads" section at www.princeton.edu/~gchow, including:

Lecture 2: "On the empirics of inflation in China"

Lecture 3: Two papers on national income determination in China that you need to look up from Prof. Chow's website.

Prof. Chow's new book "China as a leader of the world economy" will serve as the reference of lecture 6. This book will be published by World Scientific this month. It consists of his recent essays about the Chinese economy, including part 4 with three articles published recently in economics journals. It can be pre-ordered now for example from Amazon.
